

## **Shania - Age 4**

### **Mathematics**

8/25 - Shania does a number puzzle, and tells me all of the numbers.

9/11 - "My pattern is getting longer," Shania says, "It is orange, green, orange, green."

9/3 - Shania knows all of the basic shapes.

9/15 - "Look, I'm making a circle," Shania tells me. "You're making it out of big bears." She is putting 2 of each color side by side then more of each color group, near the first 2.

9/2 - When I tell Shania to put the toy on the bottom shelf, she looks at me uncertainly, then I show her which one is the bottom.

10/17 - S. comes to our measuring tape and stands with her back to it. "How much did I grow?" she asks me.

11/2 - S. recites numbers 1-10 in the correct order.

11/7 - Shania counts 5 objects accurately, touching them as she counts.

### **Social-Emotional Development**

8/29 - S. asks several times what happened to T, who is no longer at our school. She is sad to hear it.

9/8 - S. does a great job at circle. She listens, raises her hand, and shows self control. She likes the stories.

9/15 - I have been helping S. and someone else calls me over, so I go to them. S. comes to get me, asking for more help with her project.

10/6 - S. hears me call 2 children for the pretend play center. When I come to her name card she tells me she wanted to go to pretend play, but since it is full for our table, she will go to science.
